

The British Barcelona Club News.

The British Barcelona Club met with more interest than had been anticipated at a very successful Telford Show last Saturday. Our “newly weds” Anne and Richard Spooner were in attendance to answer any queries and offer what help they could to all interested parties and such was the interest shown that several new members joined the Club there and then. Much of this interest arose from the prospect of a new marking station at Basildon and a clear message came over that there will be many more who will wish to join if this marking station can be firmly established.

Basildon was one of two marking station applications that had been received and were approved at the last Committee meeting, the second being Carlisle, well to the North West of the country.

Carlisle, it is anticipated, will serve those courageous and ambitious fanciers in the North West, North East and into Scotland who are eager to participate in true long distance racing. These applications display the growing interest there is the Club and the fact that they were approved demonstrates that The British Barcelona Club is prepared to go some way towards serving that interest and a membership throughout the whole of the British Isles.
